**Ключевые слова:** развитие, молодежь, образование, системность, будущее, республика.

**Kalit so'zlar:** taraqqiyot, yoshlar, ta'lim, tizimli, kelajak, respublika

In today's globalization process, every country in the world community the level and status of education, spirituality, knowledge and upbringing of young people is defined by At any time, attention to youth is the main topic of the people has been Today, 18% of the world's population is made up of young people. Developing countries in any field of development, first of all, of the young generation relies on knowledge and creativity. So, in every nation, youth and their issues are in the center of attention, the people as a whole are responsible for their education. Creating conditions for young people is the highest issue that the state should solve and it is a source of investment that is bound to make a profit. Naturally, it is growing spiritual, educational and cultural for the development of the generation's intellect and personality heritage is of great importance. From time immemorial, our ancestors raised children and worried about him becoming a good person in the future. reached us youth is central in all literary and scientific works, epics and narratives described as an image. It can be seen that attention to young people

is their efforts to develop spiritually and become a mature person have already begun is a systematic tradition. The foundation of the immortal tradition is the spirituality of the youth. He actually is Spirituality is so important that spiritual people always reach their goal achieve? Spirituality is an invaluable quality in the development of a person as a perfect person. A person with high spirituality is able to cope with the big and small problems of life and fate. He does not succumb to his temptations, on the contrary, he takes strength from them and moves towards his goal will go forward. It is known that learning and learning is the demand and need of the time. Of young people. The environment in which these students live is a major factor in their response. That's why first of all, to improve the living and learning environment of the young generation and on this way it is necessary to implement practical reforms.

"Our young people are independent thinkers, highly intellectual and spiritual has potential, and is not equal to its peers in any field on a global scale Our country and "We will mobilize all the strength and capabilities of our society," said Uzbekistan President of the Republic Shavkat Mirziyoyev. [1] Indeed, highly spiritual The generation will definitely grow up in a state that creates opportunities and conditions. In our country, they have modern knowledge and skills, and their own independent opinion. It is most important to educate young people in the spirit of national and universal values is an issue, and the state policy on youth is at the top priority of politics, perhaps is at a high level that the times demand. Working with young people in New Uzbekistan, listen, feel and solve their problems and concerns help, to support young men and women entering independent life, everyone - state and public organizations - multi-system work together is taking.

If it takes time to solve people's problems first, solve them now efforts are being made to prevent it from occurring. Especially listening to young people, their Solving their problems has risen to the level of state policy. Third in our country. The basis and foundation of the renaissance is undoubtedly our youth! To prove this all possibilities and hart shoaroits are created. Our country started paying attention to youth, first of all, from education. "Culture comes from youth, from teaching a person in kindergarten and school. As a practical expression of the phrase "begins", reforms in pre-school education having learned from the radical reform of its institutions and world experience. It started with providing kindergartens with modern technologies. Kindergarten higher education from a young age who did not receive sufficient conditions and good education What can you expect? A practical question for just such questions as children of young age in all regions of our country equal conditions are being created for young people and teachers to receive education. The names of Imam Bukhari and Muhammad are written in golden letters on the jewels of history Khorzami, Ahmed Farghani, Abu Rayhan Beruni, Abu Ali ibn Sina, Mirza Ulugbek, The spiritual and scientific heritage left by Alisher Navoi, Zahiriddin Muhammad Babur is young truly leads the generation to perfection, their way of life and work is an example is an example. Our great-grandfathers taught us, young people, to learn, read books and science calls for strengthening with experiences. Really learning and sharing it are the brightest rays of the sun of spirituality. Kishing's consciousness is reading books and it is formed by reading it. That's why in our turt among young and old. The tradition of reading and reading books is being promoted by the council and through this initiative all strata of our people to love books even more managed to Annual reading contests improve the knowledge of young people is a basis for testing in the experiment. it is formed by reading it. That's why in our turt among young and old. The tradition of reading and reading books is being promoted by the council and through this initiative all strata of our people to love books even more managed to Annual reading contests improve the knowledge of young people is a basis for testing in the experiment.

In the era of rapidly developing Internet resources, the learning of young people and it became significantly easier to follow him, the reason: the youth of the world through networking

as a result of sharing their opinions on social networks, young people learn from each other and think in accordance with the world's demands. of the Third Renaissance social networks are of great importance. Threatening the world - due to the covid-19 disease, educational processes and many competitions are online it has become normal. So, now the Internet is our life is of particular importance as an integral part. Youth from social networks it becomes a link of spirituality directly for what purpose it is used. It is good to have computer literacy and programming knowledge in our country is creating necessary conditions for young people. The culture of using Internet networks is the basis of spirituality is the issue. Currently, the security level of networks and their productivity the formation of user skills must be directly compensated by the state.

The influence of the Internet and its contents on the spiritual world of the young generation will not pass. It is up to all of us to use it correctly and purposefully requires responsibility. For the education of young students in schools, the government has its own is mobilizing all its capabilities. Gifted and low-achieving students meet world standards in teachers' methodology in the processes of working with changes have taken place. The knowledge and potential of heads of educational institutions, to organize training courses to improve leadership skills was placed. Especially his knowledge and strength at the international, republican, regional and district levels with the mechanism of appropriate awarding of young people who win competitions and this, of course, will lead young people to a bright future, their state and society convinces, convinces that there are places in his life! Here are the conditions youth activities that respond appropriately to television, the press and the Internet to all young people throughout the republic, which will be covered continuously and in detail in their publications provides spiritual encouragement and motivation. Young people are today and tomorrow of our society.

The greatest wealth of Uzbekistan and youth is a priceless treasure. Our rights and interests in our country strong legal framework for protection, creation of necessary conditions is available, and this system is improved in accordance with the requirements of the time is going Until then, about 50 laws on youth have been passed by the parliament documents were accepted, and about 40 international legal documents were signed.[2] For example, on September 14, 2016, the head of the state of Uzbekistan Shavkat Mirziyoyev The first legal document he signed was the Law "On State Policy Regarding Youth".and the Decree of June 23, 2017 "On the state program of our youth future" can be a clear example. [3]

About 64% of the population of Uzbekistan are young people.[4] From this it can be seen that more than half of the labor resources are young people. All three at the moment one of the leaders is a youth. The proof of this is in the Senate of the Oliy Majlis established Youth Parliament, Youth Union of Uzbekistan and its new composition We can see the example of the Youth Affairs Agency, which was added as Today's in order to prepare young people for leadership with their entrepreneurship conditions are created for them to engage in and protect them from the effects of various harmful diseases in order to solve important tasks such as making and preventing crime Within the framework of the state program "Youth is our future" under the Youth Union of UzbekistanThe "Youth is our future" fund was established. Youth start-up business initiatives 7% per annum through commercial banks to implement their ideas and projects "Young Entrepreneurs" co-working centers were established within the framework of preferential loans done. of all changes in the creation of an enlightened society of new Uzbekistan fundamental reforms are also being carried out in the educational system, which is considered the basis. The same the amount of expenses for education, including the social sphere, is the state budget is more than half of its total value. He pays attention newly opened and opened state organizations and private ones leadership or similar positions in organizations are held by young people like us. At this point, I am currently a university student in my field

I am making progress. Based on these, to the youth of my country attention is given. Foreign languages opened at the initiative of our country's president I graduated from the specialized Ibrat boarding school with a gold medal and now mastering 6 foreign languages per day (English, Russian, German, French, Turkish and Arabic) I'm coming Enriching the consciousness and outlook of young people and increasing their spirituality organizer of many forums, summits, contests and competitions organized for I am a participant and a winner. With my talent, at the international level as well I am making progress. Republic established for the first time in 2020 Together with the head of our state and leaders of other official organizations, he attended the youth forum I sat in the ranks, in the presidium as the first youth representative. Again with the head of our state I managed to meet and talk. We, the youth, are the leaders of our country people are waiting for us, they believe in us.

The founders of the Third Renaissance are, of course, young. The period of growth in our country depends only on the high potential of young people. To talk more with the young generation so that they grow up as the backbone of the country, to find a way to his heart, to know his pain, to give practical help to solve his problems, especially help girls master the secrets of science and profession giving, protecting their rights, finding a worthy place in life advice should be given. Representatives of all levels of society, starting from the state, are on this path is responsible. After all, when the forces are united, there is no room for defeat! Together, we are bigger our strength! In the formation of the spiritual world of young people, science, education, environment, reading books, etc purposeful use of the Internet is extremely important.
